HIGH LIFTER RUBICON / RINCON FRONT FENDER KIT

Allow oversized tires to be mounted on front of Rubicons and Rincons without rubbing!

The Honda 500 Rubicon comes from the factory with small fender and floorboard support rods crossing the inside rear corner of the front fender well. These rods are about 5/6" and also support the floorboards.

When oversized tires (larger than 26 x 9.5) are mounted on the Rubicon or Rincon, they will rub the support rods and have the potential to damage the ATV. To overcome this problem, High Lifter has designed a heavy-duty replacement bracket that removes the rod and allows mounting of up to 28 x 10.5 tires (with a lift kit) on the front of the ATV. The replacement bracket does not reduce ground clearance or present an opportunity to hang on logs, etc. No drilling, cutting or permanent modification is required for installation.

COVER SAVER

Cover saver helps eliminate handgrips from tearing through the cover and aids in cover installation. Just slip "Handle Balls" over existing handgrips before installing cover; they allow the cover to slip on and off much easier and increases the life of the cover, especially while trailering. Good for Snowmobiles, ATVs, Watercrafts, Motorcycles etc.
