## HAND SHIFTERS

Our universal Hand Shifter works great on all models. You choose a long or short handle. Our hand operated shift levers mount to most ATV foot shift levers. We have developed a unique way to fasten the shifter's knob to the steel rod. Our hand shifter is sturdier than others, with stronger mountings, and a better finish. Our shift levers come in a long handled and a short handled model depending on your preference. The Yamaha Big Bear is the only model we have found that our standard shifter doesn't fit. To satisfy that problem we have brought back a previous model that fits the big bear.
