

EBC DRC SERIES COMPLETE CLUTCH KIT (INCLUDING SPRINGS, FRICTION AND DRIVEN PLATES)

The US #1 Selling off-road clutch!

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snatch.
- Complete engine set of friction plates, HD springs and Steel Separator Plates prevent premature driven plate wear, oil muddying and loss of stack height.
- EBC DRC kits are built with swaged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

EBC CLUTCH KIT

CONTAINS ALL FIBER PLATES TO REBUILD THE ENTIRE CLUTCH.

Premier Clutch Kits are asbestos free and lined with heavy duty anti-swell friction material, almost identical to OEM.

We recommend soaking plates in drive case oil for 3-4 hours before installation. Always fit new clutch springs to avoid clutch slippage. Always check driven plates (steel or alloy plate with teeth on inside) for thickness and surface condition.

SPRINGS NOT INCLUDED.

Dalton Industries Limited

DALTONPro CLUTCH KITS FOR AUTOMATIC ATVS

DaltonPro ATV Clutch kits are designed for use in today's most popular ATVs equipped with CVT belt type transmissions. They are designed with an emphasis on better belt grip, improved belt life and better acceleration without losing top speed. Some kits are designed for case specific re-calibrations such as oversized mud tires, etc. Some prominent features of DaltonPro are:

- Highest quality materials • Precise CNC machining for maximum accuracy • Improved belt life • Better acceleration.

KAWASAKI BRUTE FORCE 750 4x4 2005 (STOCK AND OVERSIZED TIRES) DK750BF 112.50

The new sport oriented clutch kit for the powerful new Brute Force 4x4 offers improved acceleration and throttle response. Increased belt grip offers a more useable high range at lower speeds. This clutch kit contains a "mass adjustable" flyweights system making it flexible for clutch tuning. The flyweight **total mass** and **location of mass** can be adjusted by means of removable rivets. Instructions are included, including a baseline set up for both **stock and oversized tires**

POLARIS SPORTSMAN 600, 2003-2004, OVERSIZED TIRES DBW600 33.50

With the addition of oversized mud tires, our heavier Dalton EBS black secondary spring was used in conjunction with our plain/white primary spring. We now package this popular combination in kit form, complete with instructions. The result is better belt grip and acceleration, along with much better throttle response and backshifting. When used with stock tires this kit may cause a slight loss of top speed (1-2 mph). Works well with high altitude applications.
